COME HOME TO COMFORT AND ENERGY SAVINGS

CERTs and Honeywell Programmable Thermostat Exclusive Rebate Program

Our Partner:

Honeywell

A leader in energy efficiency technology and controls

Comfort, Convenience, & Conservation

CERTs is partnering with Honeywell, a company that employs thousands of Midwesterners, to offer an exclusive rebate on programmable thermostats.

Programmable thermostats provide comfort with real energy savings. "Come Home to Comfort" with a new programmable thermostat, and start saving!

OFFICIAL CAMPAIGN KIT

CERTs and Honeywell are teaming up to offer an exclusive rebate for programmable thermostats. Add comfort and convenience to your home while saving up to 33%* on your heating and cooling energy bills by participating in the Programmable Thermostat Exclusive Rebate Program.

"Come Home to Comfort" with a new programmable thermostat and start saving!

What is a programmable thermostat?

A programmable thermostat allows you to pre-set your home's heating and cooling system to work around your schedule, providing *ultimate comfort* for your household.

Programmable thermostats help you ensure *efficient operation* of your heating and cooling system, resulting in real energy saving and lower energy bills.

How do I get the Rebate? How does it work?

Follow these steps to access and secure your rebate for \$10 off a Honeywell programmable thermostat valued at \$50 or more (save \$5 on models valued less than \$50):

- 1. Get your rebate:**
 - Visit the MN State Fair Eco Experience Building Aug. 26 – Sept. 6, and get "Savings on a Stick"; or
 - Visit the Campaign webpage to print off your rebate: <http://thermostat.mncerts.org>; or
 - Send an email with your full address to CERTs Campaign Coordinator, Michelle Vigen, at rebates@cleanenergyresourceteams.org.
- 2. Read the Buyer's Guide to determine which programmable thermostat features are best for you.**
- 3. Purchase a Honeywell programmable thermostat** at any of Honeywell's retail partners (<http://yourhome.honeywell.com>) in MN, WI, ND, SD, and IA (online purchases not eligible).
- 4. Fill out your rebate form and mail in** with copy of receipt and original UPC from packaging.
- 5. Install and program your programmable thermostat.** (See below for more details).

This is an official CERTified Campaign. To see more campaigns, visit <http://act.mncerts.org>. The Clean Energy Resource Teams connect you and your community members with resources to identify and implement energy efficiency and renewable energy projects.

* If used as directed. Savings may vary depending on geographic region and usage.

How much energy and money can I save?

The average household in the Upper Midwest that programs their thermostat in the summer and winter using default settings will save around 15% on heating and 25% on cooling costs, saving over \$200 annually.

(See the ENERGY STAR Programmable Thermostat Savings Calculator for state-specific savings at <http://bit.ly/energystarcalc>.)

Buyer's Guide: Which programmable thermostat should I buy?

Honeywell offers a variety of programmable thermostats to match your schedule, your comfort, and your budget.

Visit <http://yourhome.honeywell.com> to find a Honeywell Retailer near you and to browse a wide selection of programmable thermostats. Your rebate is eligible on *any* Honeywell Do-It-Yourself programmable thermostat.*

Here are three popular and eligible models that highlight a variety of convenient features:

How do I install my thermostat?

Honeywell's Do-It-Yourself programmable thermostats are specially designed to install in less than 15 minutes and in four simple steps. Start by watching the video: <http://thermostat.mncerts.org>. For further questions regarding installation and support of your Honeywell programmable thermostat, contact Honeywell's customer service experts at 1-800-468-1502.

1	2	3	4
<p>Turn off power source. Remove old thermostat cover. Leave wires in place.</p>	<p>Use included labels to label wires. Disconnect wires and remove old backplate.</p>	<p>Install new backplate and reconnect wires to match the labels.</p>	<p>Mount new thermostat cover. Turn on, and program!</p>

How should I program my programmable thermostat?

How you program your programmable thermostat determines how much energy you save. The longer your home is stabilized at its seasonally efficient temperature, the greater the savings. Below is the recommended schedule by ENERGY STAR to maximize comfort and energy savings.

Note: All of Honeywell's programmable thermostats are pre-programmed with recommended settings for your convenience, so you can start saving right away. For more information, visit ENERGY STAR's website at <http://bit.ly/energystarstats>.

Recommended settings:

Mode	Time Interval	Efficient Winter Setting	Efficient Summer Setting
Wake: Home in the morning	6am	70 °F	78 °F
Day: Gone for work/school	8am	62 °F	85 °F
Evening: Home in the evening	6pm	70 °F	78 °F
Sleep: Home asleep	10pm	62 °F	82 °F
